Sexual Harassment And Rape Prevention

Saturday February 18, 2012
8:30am - 5:00pm

Hosted By Cunningham's ATA Martial Arts
2622 West Main
Bozeman, Montana 59718

SEXUAL HARASSMENT

It exists in the workplace, at schools, and in many places in our society. SHARP covers not only the laws pertaining to sexual harassment but also how to avoid it and how to counter it with verbal and physical techniques.

PASSIVE ASSAULT

Sexual harassment, non-violent intimidation and other passive assaults can occur anywhere. How to react with controlled measures, including limited use of force, is key to escaping the situation without escalation.

ACTIVE ASSAULT

Your response to a threatening situation is critical to your chances of survival. Active assaults can include grabs, punches, chokes and even attacks with weapons. SHARP gives you the knowledge, confidence and determination you will need to successfully counter an active assault.

SHARP material is founded on statistics-based research and focuses on what is real and what works. By emphasizing the principal that less is best, SHARP material is kept simple so it is easy to learn, and more importantly, is easy to retain and use.

SHARP clinic participants receive effective and realistic training to counter sexual harassment and assault by instructors certified by PPCT Management, an international training organization specializing in teaching military, law enforcement and civilians in tactical and self defense practices. SHARP is based on Pressure Point Control Tactics (PPCT) which is nationally recognized as one of the most effective foundations for self defense techniques.

- Confidence through knowledge of yourself and those that may harm you.
- An understanding of high stress situations and how they affect you physically and mentally.
- Skills to avoid and counter both passive and active assaults.
- Empowerment to confront those who would try to intimidate you.
